# IC100 CRANES

An exciting year for the IC100 ranking of the world's largest crane-owning companies as it nears its third decade, writes **ALEX DAHM**

# Growing up

**M**ore and bigger change is a pervasive element of ICST's table of the world's largest crane-owning companies in its 2024 iteration.

That change is almost universally positive, continuing the return to growth that began last year after the pandemic.

Starting with the 2024 headline combined index figure for all 221 companies entered this year, the total of 37,712,101 points is 9.28 per cent up on the 34,510,957 points of 2023. Last year the overall number was 216 companies so there has been a net gain of five companies. This was achieved with the addition of 13 new or returning companies, positively offsetting the removal of eight companies, two due to acquisition and the remainder were just old data.

Turning to the IC100, this year's total is

35,107,721 points, up an impressive 8.43 % on the 32,377,509 of 2023. Last year it was up 6.1 % on the previous year. The top 100 companies account for 93 % of the 221 company total figure, near enough the same as last year's 94 %.

### MOVING TOGETHER

While nothing has changed at the top with Mammoet retaining its number one spot, its nearest rival, Sarens, is now ever so much nearer to it than ever before. Last year the gap between the two was 646,318 Index points but this year that has been slashed to less than half that, at 319,530 points.

In 2023, Sarens was 81 % the size of Mammoet while now it is 91 %. Mammoet is less than 2 % bigger than it was last year but Sarens is 13.58 % bigger. Add another »

### THE IC100

There are **877 more** wheeled mobile cranes in the 2024 IC100 than last year, up **3.34%** on the year before.

There are **276 more** lattice cranes in the IC100 than last year, up **3.43%**.

There are **1,714 more** employees in the IC100 companies than last year, up **2.02%**.

There are **49 more** depots in the IC100 than last year, up **3.12%**.

## NOTES FOR THE IC100

Companies are ranked by their *IC* Index, calculated as the total maximum load moment rating, in tonne-metres, of all cranes in a fleet. All companies in the list, plus prospects, have the opportunity to supply fleet information and the other requested data for inclusion in the ranking. Where companies supply full data the figure used is calculated by them.

In some cases, where data is lacking, we have based a company's figure on an *ICST* estimate. In cases of insolvency, acquisition or lack of sufficient information, companies are withdrawn from the table.

While we make great effort to ensure the accuracy of information provided, it cannot be guaranteed and *ICST* accepts no liability for inaccuracies or omissions.

The *IC100* Index will next be updated in the first quarter of 2025. If you think your company should be included, please contact *ICST* for an application form. Note that tower cranes are not in the *IC100* because they appear separately in the *IC Tower Index* published in October's *ICST*.

Similarly, specialized transport equipment is also featured separately, in the *IC Transport50*, in the August issue of the magazine. Calls for entries in these tables are also issued and widely publicised like the ones for the *IC100*. Please look out for them at: [craneandtransportbriefing.com](http://craneandtransportbriefing.com) and in the World Crane Week e-mail, and on our social media channels.

couple of blue and yellow super heavy lift cranes before next May and next year's *IC100* could have a new leader.

Elsewhere in the top ten there has been more movement than usual but there are no new entries or leavers.

Contributing to some of the position changes may be a noticeable increase in the number of large crawler cranes, for example 2,000 and 4,000 tonne capacity models, often from the Chinese manufacturers, joining fleets. Some of the companies with these giants are Sanghvi, Sinopec, Hareket, Tiong Woon, Sarilar, SoP&G and Barkat. All have also made gains in the table this year.

### ON THE UP AND UP

Talking of gains, Aguado from Spain looks like one to watch. Mario Aguado told *ICST* he has invested tens of millions of euros in new equipment in the last three years.

Acquisitions have also affected the table, notably with Barnhart adding three more companies already in 2024, namely Baxter Crane and Rigging, White Crane and CR Holland. Also in the USA, Bay Crane has been especially acquisitive in recent years, adding to its portfolio United Crane and Rigging, Crane Rental Company, and Capital City Group, among others.

As a result of its acquisition of fellow Belgian rental company Michielsens, five years ago, Aertssen has combined the two

companies' numbers as they have now been fully merged, operationally and sales-wise, into one company. This has increased Aertssen's *IC* Index from 184,598 to 224,907, (21.8 %) helping it gain one place, at 36.

Of the new or returning entries, the highest placed was Trungnam from Vietnam, at 24. It was followed by Singapore-based AsiaGroup in 60th place, absent from the table since 2019 when it was 43rd. Our next new entry is Premier Heavy Lift from India, in at 71st place. Then another welcome joiner, in 78th place, is Guindastes Tatuape from Brazil. Close behind is another new entry, Naser M. Al-Baddah & Partner General Trading & Cont. Co, also known as NBTC Group, from Kuwait, in at 81. Making a welcome return but just outside the *IC100* in 102nd place is Hellmich from Germany. ■
